

3190 Series

Point of Sale System

The 3190 all-in-one touch screen workstation provides efficient performance, superior reliability and exceptional value. Based on open architecture and embedded components, the 3190 protects your system investment by ensuring a long productive life in the most demanding retail environments.

More Flexibility

- The all-in-one integrated footprint is a perfect fit for space-conscious deployments, as well as for temporary and seasonal store locations.
- Available with a Projected Capacitive (PCAP) Touchscreen, as an option. This latest touch technology delivers application flexibility and exceptional durability for any environment.
- Designed using the latest Intel® Skylake processors and chip set technology, this system can handle the most demanding retail applications with ease.
- A variety of configuration alternatives, including an integrated MSR, customer display and wireless LAN, allows retailers to build a solution that best fits their business and technical requirements.

Easier Serviceability

- A convenient rear door design on the base provides quick access to all connections, eliminating the need for any complex cable routing.
- All ports are clearly labeled, ensuring fast set-up and easy changing of peripherals.
- One of the USB ports is located on the front of the unit for easy access and use in application upgrades or other maintenance needs.
- A dual hard drive RAID option and expandable memory offer flexibility to meet a variety of changing application needs.

Greater Sustainability

- A standard 3 year manufacturer's warranty provides retailers with peace of mind so they can focus on their retail business and not on their POS systems.
- A true flat LED touch monitor provides a bright, easy-to-read display that uses less power than conventional displays and provides increased reliability.
- The unit is 100% compliant with RoHS (Restriction of Hazardous Substances Directive).
