

1170 Series

Point of Sale System

The 1170 POS System delivers the latest high efficiency technology, exceptional reliability and outstanding system flexibility that retailers need to be successful. The 1170 is designed without the need for an internal system fan, increasing operational uptime. Its quiet operation and small footprint, along with a powerful quad-core processor, provides a perfect solution for any retail environment.

Extremely Adaptable

- With its small size, and weighing just 3.5 pounds, this unit is the perfect solution for reducing the check-out area and expanding a store's sellable inventory space.
- A variety of interface connections provide a platform that can support a wide range of POS peripherals.
- It's also small enough to mount on the back of a flat screen monitor or under the counter, greatly decreasing the footprint for a traditional fixed point-of-sale.

Most Reliable

- A truly durable platform that provides the perfect hardware solution for even the toughest retail environments
- A fanless design increases overall product dependability by eliminating a potential failure point and provides for quiet system operation.
- A smart design for easy maintenance and quick access to input and output ports, ensuring no interruption to standard operation.

Greater Return on Investment

- Designed with a powerful, yet energy efficient, Intel® quad-core processor and chip set, as well as low power system memory that greatly reduces energy consumption.
- The unit incorporates 4 GB of system memory as standard, providing support for demanding retail requirements.
- Options include solid state drives (SSD), mSATA drives and an expansion slot allowing for wireless connectivity.
