

8150 POS System

The 8150 POS System delivers the latest POS technology, high reliability for greater uptime and system flexibility retailer's demand. The 8150 is designed with a powerful 13th Gen Intel processor, durable long-life components and numerous interface ports ensuring retailers' investments are protected.

Greater Performance

- An advanced 13th Gen Intel processor provides high performance that can easily handle the most challenging retail applications
- An embedded long-life chipset provides a proven platform for demanding retailers' needs and support for emerging technologies
- 16GB of system memory is provided in the standard configuration
- The powerful electronics makes the system a perfect solution for complex POS applications

Greater Flexibility

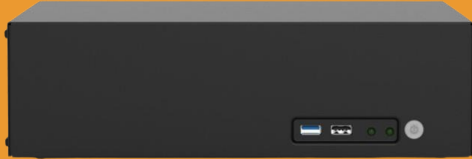

- An all-inclusive footprint allows the system to be configured on or under the checkout counter or in a retail self-checkout or information kiosk
- A variety of interface connections provide a platform that can support a wide range of POS peripherals
- All ports are clearly labeled ensuring fast set-up and efficiency when changing peripherals
- A powerful 250W power supply allows for peripherals to be powered using multiple auxiliary power ports

Better Uptime

- A durable design with long-life components provides a perfect hardware solution for the toughest retail environments
- The system is designed for easy maintenance and quick access to all ports and connections which allows for uninterrupted operation
- The standard data storage is an M.2 solid state drive which provides fast and highly reliable operation
